KODABK 11	SIZE 11	KODABR 11	SIZE 11
KODABK 12	SIZE 12	KODABR 12	SIZE 12

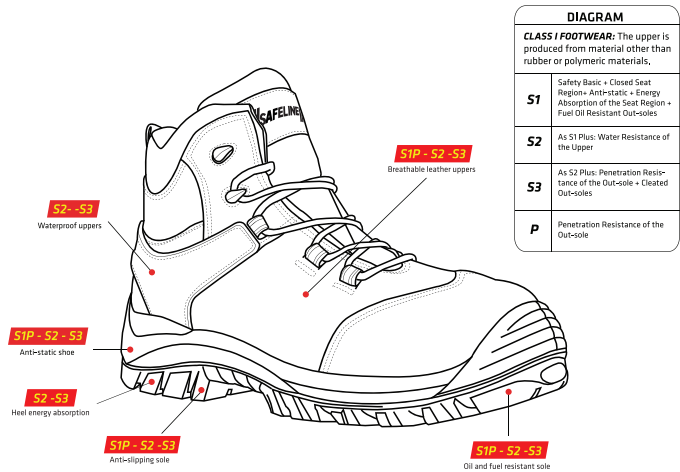

KEY FEATURES:

THE SAFETY BOOT'S OUT-SOLE IS MADE OF TOP NON-SLIP AND OIL-RESISTANT RUBBER, WHICH IS EXTREMELY SOFT AND CAN WITHSTAND HIGH TEMPERATURES UP TO 390°F.

THE MEN'S WORK BOOTS HAVE STEEL PLATES EMBEDDED IN THE TOES, THE STEEL TOE IS VERY HARD, AND IT PASSED THE ASTM F2412/F2413 STANDARD, SO THE STEEL TOE CAN EFFECTIVELY PREVENT THE TOE FROM BEING INJURED BY HEAVY OBJECTS.

FIBER MIDSOLE IS LIGHTER THAN ORDINARY STEEL SOLES, HAS BETTER PUNCTURE RESISTANCE, AND CAN RESIST PUNCTURE FORCE OF 1100N. BETTER FLEXIBILITY ALLOWS YOU TO WALK COMFORTABLY IN WORK BOOTS. WORKMANSHIP IS PURELY HANDMADE, IT MAKES THE SOLES OF WORK BOOTS STRONGER, AND STONES RUBBING AND WATER SOAKING WILL NOT MAKE IT CRACK. SUITABLE FOR A VARIETY OF COMPLEX TERRAIN WORK ENVIRONMENTS.
