

DESCRIPTION & FEATURES

Weight: 1250g
Drop-forged axe head
Heat treatment, 45# carbon steel
Unique design fiberglass handle
Packed by label

SELLING POINTS

1. The axe head is forged with 45# high carbon steel, which is hard and resistant to impact. The surface is sprayed with plastic, which is beautiful and durable. 2. The axe handle is made of durable and safe rubber-coated fiberglass handle, which is shockproof, comfortable and not easy to slip. 3. The joints are made of high-quality epoxy resin glue, which is firm, durable and not easy to fall off.
