

HEX SHANK

CLEAN CUT

PRODUCT NAME:

FLAT WOOD BIT

PRODUCT CODE/S:

CODE	WIDTH (MM)	LENGTH (MM)
4006	6.0MM FLAT WOOD BITS	150mm
4008	8.0MM FLAT WOOD BITS	150mm
4010	10.0MM FLAT WOOD BITS	150mm
4012	12MM FLAT WOOD BITS	150mm
4013	13.0MM FLAT WOOD BITS	150mm
4014	14.0MM FLAT WOOD BITS	150mm
4016	16.0 MM FLAT WOOD BITS	150mm
4018	18.0MM FLAT WOOD BITS	150mm
4019	19MM FLAT WOOD BITS	150mm
4020	20.0MM FLAT WOOD BITS	150mm
4022	22.0MM FLAT WOOD BITS	150mm
4024	24.0MM FLAT WOOD BITS	150mm
4025	25.0MM FLAT WOOD BITS	150mm
4026	26.0MM FLAT WOOD BITS	150mm
4028	28.0MM FLAT WOOD BITS	150mm
4032	32.0MM FLAT WOOD BITS	150mm
4034	34.0MM FLAT WOOD BITS	150mm
4035	35.0MM FLAT WOOD BITS	150mm
4038	38.0MM FLAT WOOD BITS	150mm
4040	12" FLAT WOOD BIT EXTENSION	150mm

KEY FEATURES:

Flatwood drill bits are a type of drill bit that features a flat end, typically used for drilling flat-bottomed holes in wood. These drill bits are designed to be used with a drill press or hand drill for accurate, straight holes. Some common features of Flatwood drill bits include:

- Material: High-carbon steel or tungsten carbide for strength and durability
- Point Angle: Usually 60 or 90 degrees, determined by the type of wood being drilled
- Flute Design: Straight or helical flutes to remove chips from the hole being drilled
- Cutting Edge: Sharp and precise for clean, smooth cuts
- Size Range: Available in a range of sizes, typically ranging from 1/16" to 1"
- Shank Type: Straight shank or Morse taper shank for secure fit in the drill chuck.

It's important to choose the right size and type of Flatwood drill bit for the specific project and material, to ensure efficient and accurate results.
