Body material:ductile cast iron
Black finish and polish
Solid rivet
Packed by paper card

Solid rivet

Stronger

Max Ø50mm

SELLING POINTS

1. The upper hook head is heat treated as a whole, forged, with large torque, not easy to break, and the surface is polished after blackening, beautiful and not easy to rust. 2. The tooth block is high-frequency treated for high hardness, and will not slip after locking. 3. The tail is PVC-coated, and the anti-slip treatment makes it feel better.
